Work Experience

Registrar Student Front Desk Reception

Michigan Technological University

August 2024 – April 2025

- Front desk position interfacing with students and faculty in person and over the phone looking for assistance from the registrar office.
- Participated in a historical student data project, creating a framework to organize and sort student documents by Microfilm roll and frame for digital retrieval and updates.

Field Technician II

Braun Intertec, Bismarck, ND

Seasons 2013, 2014, 2017, 2019, 2020

- Conducted concrete and soil testing, including gradations, physical properties, lightweight tests, and compressive strength assessments.
- Managed contract responsibilities, performed required testing, submitted reports, and communicated with clients and project managers.
- Transitioned to DOT testing during the 2019 and 2020 seasons.
- Served as a fill-in operations supervisor for approximately 5 months; handled scheduling, client communication, and maintained a team of ~5 lab and field employees to fulfill our contract obligations.
- Trained new hires, co-ops and interns on field and lab testing procedures
- Demonstrated a strong commitment to safety and accuracy.

Field Technician II

Strata Geotech, Williston, ND

September 2015 – March 2016

- Performed concrete testing in lab and field settings, and drilled pier inspections.
- Hired to provide concrete inspections on high voltage transmission line service through western North Dakota around the Watford/Williston area.

Field Tech

Material Testing Services, Williston, ND

September 2011 – June 2012

- Began with no experience and quickly developed skills in concrete and soil testing.
- Managed scheduling for concrete testing and supervised lab work.
- Developed strong foundational skills through extensive hands-on experience.
